The City of Soledad and California Green Building Standards Code require a minimum of 65% diversion of materials generated from construction and demolition (C&D) projects.

This guide will help manage the scrap materials generated from your C&D project through recycling and source separation. Following these guidelines can help you save money and comply with city/state regulations. For more Info: www.bsc.ca.gov/Home/CALGreen.aspx

- ⇒ Hauling services are available through the local franchised hauler, Tri-Cities Disposal & Recycling.
- General contractors, subs, or construction companies can self-haul by using their privately owned hauling equipment.

A list of Bonafide Recyclers is available on the city's website.

ALL weight receipts (recycling & disposal) MUST be retained from subs, hauling companies, or Bonafide Recyclers.

City Hall 248 Main Street Soledad, CA 93960 (831) 223-5000

CONSTRUCTION AND DEMOLITION WASTE REDUCTION AND RECYCLING GUIDE

WHY DIVERT C&D MATERIALS?

DIVERSION TIPS

COMPLIANCE WITH C&D REQUIREMENTS

- Recycling conserves raw materials and virgin resources by producing usable materials at a reduced cost to the environment;
- Recycling conserves energy and water, and reduces the production of greenhouse emissions and other pollutants;
- Recycling conserves valuable landfill space; C&D materials make up 29% of all waste generated in California.
- Recycling creates employment and economic activity that helps sustain local economies;
- Recycling saves money by reducing disposal and transportation costs;
- Deconstructing (rather than demolishing) in order to recycle or reuse items (i.e. cabinets or windows) can help fulfill diversion requirements.

- Develop a recycling plan before project begins.
- Track and record all weight receipts; including trash, recycling, mixed C&D, wood, salvaged materials, etc.
- Recyclable materials change during a project. Wood and steel may appear first; large quantities of cardboard at the end.
- C&D materials can be commingled or source separated (reduced fees

may apply for source-separated materials).

 Concrete, Asphalt, Cardboard, Plastics, Metal, Clean Wood & Yard Waste, Masonry, and Drywall can be recycled. See list of Bonafide Recyclers. The City of Soledad requires that all C&D materials (100% of inerts and 65% of all other C&D materials) be recycled ((Chapter 13.05 Soledad Municipal Code). To comply with the requirements:

- 1. Fill out the Waste Reduction & Recycling Plan/Report, and
- 2. Keep and track all weight receipts.

All mixed C&D and waste materials generated during a C&D project must be delivered to one of the following Salinas Valley Recycles locations:

Johnson Canyon Landfill 31400 Johnson Canyon Rd Gonzales, CA 93926

- or -Jolon Road Transfer Station 52654 Jolon Rd King City, CA 93930

Upon project completion, the Waste Reduction & Recycling Plan/Report and all applicable weight receipts must be submitted to the city demonstrating compliance with the C&D recycling requirements.
