

The City of Greenfield and California Green Building Standards Code requires a minimum of 65% diversion of materials generated from construction and demolition (C&D) projects.

This guide will help manage the scrap-materials generated from your C&D project through recycling and source separation. Following these guideline can help you save money and comply with City/State regulations. For more Info: [www.bsc.ca.gov/Home/CALGreen.aspx](http://www.bsc.ca.gov/Home/CALGreen.aspx)

## Hauling Services

- ⇒ Hauling services are available through the local franchised hauler, Tri-Cities Disposal & Recycling.
- ⇒ General contractors, subs, or construction companies can self-haul by using their privately owned hauling equipment.

A list of Bonafide Recyclers is available on the city's website

**\*ALL weight receipts (recycling & disposal) MUST be retained from subs, hauling companies, or Bonafide Recyclers.\***

# CONSTRUCTION & DEMOLITION WASTE REDUCTION AND RECYCLING GUIDE

## WHY DIVERT C&D MATERIALS?

- ◆ Recycling conserves raw materials and virgin resources by producing usable materials at a reduced cost to the environment;
- ◆ Recycling conserves energy and water, and reduces the production of greenhouse emissions and other pollutants;
- ◆ Recycling conserves valuable landfill space; C&D materials make up 29% of all waste generated in California.
- ◆ Recycling creates employment and economic activity that helps sustain local economies;
- ◆ Recycling saves money by reducing disposal and transportation costs;
- ◆ Deconstructing (rather than demolishing) in order to recycle or reuse items (i.e. cabinets or windows) can help fulfill diversion requirements.

## DIVERSION TIPS

- ◆ Develop a recycling plan before project begins.
- ◆ Track and record all weight receipts; including trash, recycling, mixed C&D, wood, salvaged materials, etc.
- ◆ Recyclable materials change during a project. Wood and steel may appear first; large quantities of cardboard at the end.

- ◆ C&D materials can be commingled or source separated (*reduced fees may apply for source-separated materials*).
- ◆ Concrete, Asphalt, Cardboard, Plastics, Metal, Clean Wood & Yard Waste, Masonry, and Drywall can be recycled. **See list of Bonafide Recyclers.**

## COMPLIANCE WITH C&D REQUIREMENTS

The City of Greenfield requires that all C&D materials (100% of inerts and 65% of all other C&D materials) be recycled (Chapter 15.24 Greenfield Municipal Code). To comply with the requirements:

1. Fill out the Waste Reduction & Recycling Plan/Report (available on city's website) and;
2. Keep and track all weight receipts

All mixed C&D and waste materials generated during a C&D project must be delivered to one of the following Salinas Valley Recycles locations:

**Johnson Canyon Landfill**  
31400 Johnson Canyon Rd  
Gonzales, CA 93926

**Jolon Road Transfer Station**  
52654 Jolon Rd  
King City, CA 93930

Upon project completion, **the Waste Reduction & Recycling Plan/Report and all applicable weight receipts must be submitted to the city** demonstrating compliance with the C&D recycling requirements.
